

Stertil-Koni, always a customized lift

In addition to mobile column lifts and in-ground lift systems, Stertil-Koni also offers a wide range of vehicle lifts. With the right system with the right lifting capacity, Stertil-Koni can provide the most efficient and economic customized solution for any workshop. From the innovative SKYLIFT – which offers unique accessibility – to the compact 2-ram lift for short vehicles. Stertil-Koni combines maximum stability with drive-on ease and optimum working height and accessibility for the mechanic.

Heavy Duty 2-Post Lifts

Capacities 16,000 up to 18,000 lbs

Stable space creators

- Models available from 16,000 up to 18,000 lbs.
- Hydraulic system: the system has two hydraulic cylinders and an electronically controlled synchronization system.
- Telescopic lifting arms: each telescopic lifting arm is equipped with a handy tool tray. Also two sets of pick-up extensions are standard.
- Flexible: the width between the columns may vary from 110" to 126". Therefore you can adapt the lift to your workshop or range of vehicles.
- Design: the lift is highly stable due to the specially-designed base plates.

4-Post Lifts

Capacity 30,000 lbs

Uniquely low drive-on height

- Models available 30,000 lbs.
- Unique drive-on height: the extremely low drive-on height guarantees that vehicles with low ground-clearance can be driven onto the platforms without grounding. This low drive-on height means that "short" drive-on ramps can be used, leading to more space available for moving vehicles around in your workshop.
- Made-to-measure solutions: thanks to the wide variety of lengths and widths of these 4 post vehicle lifts, Stertil-Koni always has a platform suited to your workplace or your vehicle program.
- Optimum access: the 24" wide platforms make these 4-post vehicle lifts ideal for commercial vans and light freight vehicles with twin wheels.

Heavy Duty 4-Post Lifts

Capacities: 38,500 to 108,000 lbs

Design without cross beams

- Models available from 38,500 up to 108,000 lbs.
- No cross beams: there are no cross beams on this lift providing a great deal of access under the vehicle.
- Flexible: for lifting articulated buses, trucks with semi-trailers and articulated units, connected versions are available.
- Track lengths: available track lengths from 15' - 5" up to 78' per configuration set-up.

SKYLIFT

Capacities 44,000 up to 154,000 lbs

State-of-the-Art technology

- Models available from 44,000 up to 154,000 lbs.
- Space: vertical lifting with absence of crossbeams and posts.
- Highest safety: locking from floor level.
- Easy access: clear floor access from all sides allows no obstructions for axle stands, wheel dollies, etc.
- Track lengths: available lengths from 23' up to 110' per configuration set-up.

Stertil-Koni accessories and attachments

High Lift Wheel Dolly
(1,000 lbs)

Foldable Axle Stands

JS-M8 & JS-M12
(18,000 - 26,500 lbs)

JS-H8 & JS-H12
(18,000 - 26,500 lbs)

HD Transmission Jack

JS-M8 & JS-M12
(3,500 lbs)

HD Jacking Beam

(15,400 - 50,000 lbs)

Superior solutions by quality people

Maximum flexibility using mobile column lifts

Stertil-Koni offers solutions that allow you to lift a wide range of vehicles fast and safely for the most efficient servicing. From delivery vans and semi-trailer towing vehicles to complete road trains and articulated buses. The mobile column lifts make your workshop highly flexible. To which Stertil-Koni adds a maximum level of safety and convenience with its innovative wireless technology. Within this range, the Stertil-Koni Earthlift represents the most advanced and environmentally friendly mobile column lift in the world. Thanks to its patented Active Energy Retrieval System, the Earthlift provides up to 35% greater lifting efficiency and with its infinitely adjustable lifting and lowering speeds it is the ideal mobile column lift for any workshop.

The Stertil Group offers its customers worldwide customized, technologically sophisticated solutions for their heavy-duty lifting requirements and dock equipment, including the best possible service from strong local partners. These superior solutions are conceived, developed and realized by a team of specialized professionals with unique experience. Thanks to its 'quality people', its total in-house production process and its international organization, Stertil-Koni is the world leader in the field of heavy-duty lift systems.

Mobile Column Lifts

Capacities 13,000 up to 22,000 lbs per column

cable-operated models
Mobile power for the heaviest of vehicles

- Models are available in 13,000 lbs - 16,000 lbs - 18,000 lbs - 22,000 lbs per column.
- 69" lifting height.
- Two types of Control systems
 - Conventional
 - Superior
- Conventional up to 4 column.
- Superior up to 28 columns.
- Ideal for lifting RV's: this lift can be equipped with base and fork extension to lift vehicles with inset wheels.
- 14" length of fork (ST 1060 & ST 1082 models).
- 12" length of fork (ST 1073 & ST 1100 models).
- Lifting speed: 85 seconds.
- Battery versions with 24V available.

Mobile Column Lifts

Capacities 13,000 up to 22,000 lbs per column

wireless models
Wireless efficiency, superior control

- No communication cables connecting the columns.
- First ALI (Automotive Lift Institute) member with wireless technology.
- Available in 13,000 lbs - 16,000 lbs - 18,000 lbs and 22,000 lbs per column.
- 20 full cycles under full load without recharge.
- Easy re-charging with 110 volt outlets.
- 24 VDC with built-in recharging system.
- OSD (on screen display).
- Programmable features including automatic height reference setting and multi-lingual operation.

Mobile Column Lifts

Capacity 18,000 lbs per column

Up to 35% more lifting efficiency

- The 'green' standard in lifting technology.
- Made of components that are 98% recyclable.
- The patented Active Energy Retrieval System increases the number of lifting cycles.
- Safe working conditions because of the absence of cables.
- Variable raising and lowering speeds for positioning the vehicle extremely accurately.
- Easy re-charging with 110 volt outlets.
- 24 VDC with built-in recharging system.
- OSD (on screen display).
- Programmable features including automatic height reference setting and multi-lingual operation.

In-Ground ECOLIFT

Capacities 60,000 up to 90,000 lbs

Great performance, minimum installation depth

- Models available from 60,000 up to 90,000 lbs.
- Hydraulic: system is fully hydraulic with double acting cylinders and low oil volume requirements.
- Flexible: the ECOLIFT is completely flush mounted and has an extended front pit travel, thus making it possible to pick up virtually any vehicle.
- Installation: the ultra shallow pit design ensures huge cost savings on construction and installation. The ECOLIFT is also extremely suitable for installation in existing workshop pits and at locations with a high water table.

In-Ground Lifts

Capacities 64,000 up to 308,000 lbs

Ideal for in-ground lift renewal

- Models available with 2,3 and up to 4 rams.
- Pump/motor directly attached to cylinder.
- All models available with single stage or telescopic cylinders. Both cylinder types have 75" stroke.
- Lifting capacity: 32,000 lbs per piston (up to 4), 50,000 lbs per piston (up to 4), 77,000 lbs per piston (up to 4).
- Internal locking safety devices.
- Moveable pit covers.
- Unique electronic synchronization.
- Low volume hydraulic fluid.
- Unique capability to retrofit existing traditional in-ground lifts.

The certainty of expert service

A worldwide network of partners guarantees optimum service. Thanks to regular training by Stertil-Koni, our nationwide network is keeping their knowledge up-to-date.
