Fully customizable
fleet washing
systems that help your
**profits
sparkle!**

For two decades, **awash eco wash systems** (formerly ACC International Inc.) has delivered efficient, economical and ecological solutions to fleets across North America. **awash** provides large vehicle wash systems, waste water treatment systems and wash bay consult • design • build solutions. Specialized systems and solutions designed to keep your vehicles clean and professional looking...and your waste water safe and non-hazardous.

Efficient, economical and ecological fleet washing systems that save you time and money. That makes good sense – for your business and for the environment.

Powerbrush₂O

ECOLOGICAL FLEET WASHING SYSTEM

With thousands of installations across North America, **Powerbrush₂O** is the most economical, efficient and time-saving large vehicle wash solution available on the market today. The economical **Powerbrush₂O** delivers:

- one person operation
- water savings
- time savings
- space savings
- energy savings

And, the **Powerbrush₂O** can be installed and running in less than 24 hours.

Powerbrush₂O is a one person, efficient, economical and ecological fleet washing system that saves you time and money. Period.

Standard sizes available from 10'6" to 14'

Rugged light weight aluminum construction

Brass nozzles

Steel spray pipes

Virtually maintenance free

Polythylene cruciform brushes

Complete shield, brush and water spray tilting

Non-marking safety wheels

Automatic water and control valves

Water activated tilt mechanism

Heavy-duty 2.0 hp motor gearbox assembly

THE WALKAROUND

THE ONBOARD

Powerbrush₂O Go

MOBILE ECOLOGICAL FLEET WASHING SYSTEM

Taking it to the next level, the **Powerbrush₂O Go** packs all the high performance features of the **Powerbrush₂O** into a fully mobile wash system. Requiring no hose and no electrical cord, the **Powerbrush₂O Go** is always available – when and where you need it!

Featuring our unique Brush Inclination System, **Powerbrush₂O Go** is available in two powerful models:

THE WALKAROUND

- one person operation
- easy steer enhanced system
- diesel, gas or battery models available

THE ONBOARD

- one person operation
- "stand up" or "sit down" system
- diesel model available

Electropulse

THE NEW GENERATION OF WASH WATER TREATMENT

The revolutionary Electropulse system's proprietary "One Step Electrocoagulation Treatment Process":

- fully automated waste water treatment system with recycling capabilities
- NO daily maintenance required
- NO filters to change or clean

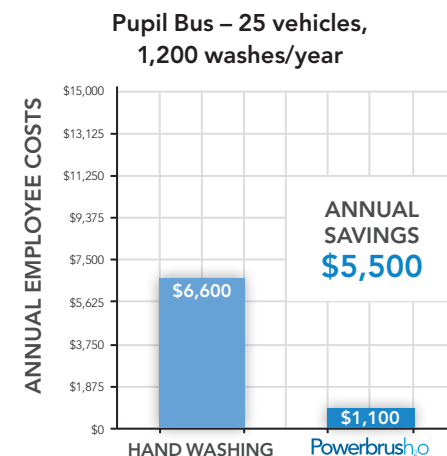

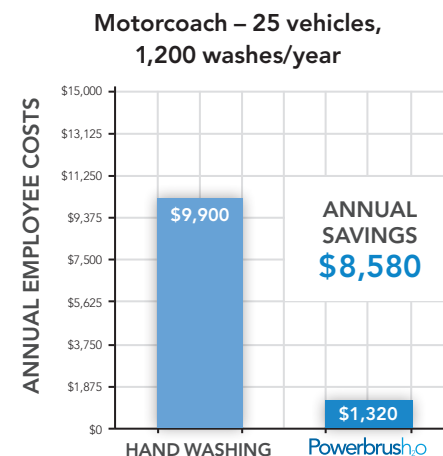

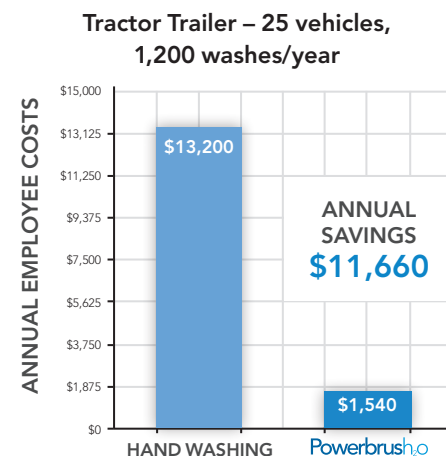

- NO separation chemicals required
- removes emulsified oil, grease, gasoline, antifreeze, TPH, suspended solids, dirt, and heavy metals

Electropulse separates contaminants from waste water... renders contaminants non-hazardous and recycles clean water to a holding tank for reuse. That makes good sense – for you and for the environment. Period.

COST ANALYSIS – EMPLOYEE COSTS

Hand Washing Vs. Powerbrush₂O

(based on 1 employee at \$11.00/hour wage)

Hand Washing Vs. Powerbrush₂O

8 WASHES PER DAY				
		TRUCK	COACH	SCHOOL BUS
3/4" hose	US Gallons	11,040	8,280	5,520
30 days	US Gallons	331,200	248,400	165,600
COST ANALYSIS
