NL- Stertil BV_01-2016 Adjustable Forks on ST 1075 Series

Dear Partner,

Subject: Adjustable forks now available on ST 1075 Mobile Column Vehicle Lifts .

Product Improvement

We are pleased to inform you about an improvement in our assortment of mobile column lifts.

Listening to the market requirements we decided to introduce **adjustable forks** on the **Stertil-Koni ST 1075 Series**.

The open orders in the system will be delivered as confirmed and will not be changed. All new orders from 2nd of May 2016 will standardly be delivered with adjustable forks. They will have the same price as currently the versions with fixed forks. Fixed forks will still be available. You will receive an updated pricelist with the new article numbers separately on short notice.

Increased Ease of Use

The customer now easily can adjust the width of the forks without the use of wheel adapters.

A wider range of vehicles now can be lifted and serviced without the need for additional adapters. The engineer can work comfortably with the mobile column lifts being more flexible in the workshop.

Brochure Update

We have updated the ST 1075 brochure and it will be available for download online on short notice and can be ordered in print.

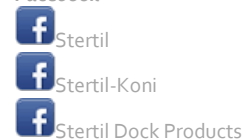

If you have any questions or remarks, please do not hesitate to contact your Stertil-Koni Sales Team.

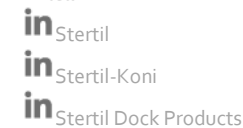

Comment

Do you have a LinkedIn profile, then update now so that you can be listed under Stertil. Further, follow us on Facebook, Twitter, YouTube & Google+ for news about Stertil, Stertil-Koni & Stertil Dock Products.
